Attracting the right candidates is not down to luck, so why risk it when you don't have to?

DON'T GAMBLE - attract and manage the best candidates with a mobile app.

Dear Firstname,

If you are like the majority of recruiters I talk to, you want to place more candidates and...

...manage your candidates more effectively, without spending loads of time on admin.

At Mobile Rocket over the past 10 years, we have perfected the latest app technology to help recruiters.

What this means for you is that we guarantee to save you time and money using your own branded app.

You will love your app, because you can:

- Showcase your best role in seconds
- Collect timesheets
- Track candidates by location
- Collect availability – ahead of time
- Register and upload documents
- Push out messages and much more...

On average recruiters who have their own branded mobile app are saving more hours every month and are placing more candidates.

We are offering a **FREE** branded app design preview so you can see exactly how your app will look in the stores.

Contact me directly on **07873 337381** or kevin@mobilerocket.co.uk so that we can book you in.

Kind Regards,

Kevin Ireson
Sales Director
Mobile Rocket
